# SREE VISHNU KANCHIPATI

vishnukanchipati@gmail.com | **+91-81xxxxxx59** | Hyderabad, India
Portfolio | GitHub | LinkedIn | LeetCode | GeeksforGeeks

## SUMMARY

Computer Science undergraduate with project experience in Android development, full-stack web applications, and transformer models. Built scalable platforms using Next.js, Kotlin, and FastAPI, with deep focus on systems architecture, offline resilience, and PyTorch transformer implementations.

## EDUCATION

**Institute of Aeronautical Engineering, Hyderabad** — Expected graduation: May 2028
B.Tech in Computer Science and Engineering — CGPA: 8.59/10 (Till IV Sem)
**Narayana Junior College, Kukatpally** — March 2024
Intermediate — Percentage: 94.0/100.0
**TVR Model High School, Hyderabad** — May 2022
SSC — GPA: 9.8/10

## TECHNICAL SKILLS

**Languages:** Java, Python, Kotlin, Dart, TypeScript, SQL; HTML, CSS
**Web and Mobile:** Next.js, React, FastAPI, Flutter, Android SDK, Jetpack Compose
**Libraries and ORMs:** PyTorch, Hugging Face Transformers, Prisma ORM, ExoPlayer, Room
**Tools and Databases:** PostgreSQL, Supabase, Git, GitHub, Docker, Android Studio, Firebase
**Fundamentals:** Data Structures and Algorithms, Systems Design, Object-Oriented Programming

## PROJECTS

**HyFlex — Scalable Video Learning & Assessment Platform** ( GitHub ) October 2026

- Built an enterprise interactive video lecture platform serving 5,000+ students with forward-seek restriction, embedded quiz checkpoints, and automated grading.
- Architected an interval-merging progress sync engine with self-healing recovery, slashing serverless function invocations by >85% under high concurrent loads.
- Implemented role-based faculty portals with automated roster imports, cohort analytics, and multi-format (PDF/Word/Excel) academic grade reports.

**Vikify — Android Music Player** ( GitHub ) December 2025

- Built an open-source Android music player in Kotlin with ExoPlayer for background audio playback.
- Integrated Room for on-device data persistence.

**NumGPT — GPT-Style Reasoning Model (In Progress)** October 2026

- Implemented a character-level tokenizer and a synthetic addition-data generator using reversed-digit encoding.
- Implemented a TransformerLens-compatible GPT-style model architecture for algorithmic reasoning tasks.

## CODING PROFILES

**LeetCode:** 140+ problems started
**GeeksForGeeks:** 90+ problems started
**HackerRank:** Certifications in Java, Python, and CSS
2 badges in Python and 1 badge in Java

## HONOUR AND ACHIEVEMENTS

- Earned **3rd prize** in a national-level hackathon (2025) for AgroNova. ( Certificate )
